

The 10th International Bio Expo Presentation and Poster Session in “Bio Academic Forum”

The 10th International Bio Expo called “Bio Academic Forum” has been held at Tokyo Big Sight from Wednesday, June 29th, 2011 to Friday, July 1st, 2011. Two of our tenure-track researchers, Dr. Kenichi Onodera and Dr. Maki Teramoto, have participated in this conference along with Professor Masashi Tuda in order to present their research achievements and poster session. Most of the presentation has been ended in remarkable success even with standing audiences. The event has brought the latest advanced technology by many researchers who belong to the universities or national research institutions. It has provided great opportunities for them to obtain industrial cooperation, such as technology transfer, licensing, and joint research.

(Poster exhibition of Dr. Onodera)

(Poster exhibition of Dr. Teramoto)

(Audiences in Conference Hall)

[Oral Presentation of research Result]

Kenichi Onodera, Specially Appointed Assistant Professor

(Date & Time: Friday, July 1st 11:30 – 12:00 Site: ACA-7)

Presentation Title: “Searches for Useful Substances of Marine Microalgae”

Maki Teramoto, Specially Appointed Lecturer

(Date & Time: Friday, July 1st 12:10 – 12:40 Site: ACA-6)

Presentation Title: “Utilization of Microbial Resources in Deep Sea Environments”
